

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions and listings of claims in the application:

1-26. (Canceled)

27. (Currently Amended) A process for shaping or holding a hairstyle, comprising:

dispensing a hair composition using a dispenser device, said dispenser device comprising a reservoir containing said hair composition; wherein

(i) the composition comprises, in a cosmetically acceptable medium, at least one polycondensate (A) comprising at least one block chosen from polyurethane and polyurea blocks and at least one film-forming polymer (B), wherein the at least one polycondensate (A) is different from the at least one film-forming polymer (B), and wherein the at least one polycondensate (A) is formed by an arrangement of blocks, said arrangement of blocks being obtained from:

(1) at least one compound which contains at least two active hydrogen atoms per molecule;

(2) at least one substance chosen from at least one diol containing at least one acid radical and the salts of said at least one diol; and

(3) at least one isocyanate chosen from di- and polyisocyanates and wherein the at least one polycondensate (A) is formed from at least one compound having a silicone skeleton chosen from polysiloxanes, polyalkylsiloxanes and polyarylsiloxanes;

wherein the at least one film-forming polymer (B) is chosen from anionic polymers chosen from:

-polymers comprising carboxylic units derived from unsaturated mono- and dicarboxylic acid monomers of formula:

wherein n is an integer ranging from 0 to 10, A comprises a methylene group, optionally connected to the carbon atom of the unsaturated group or to the neighboring methylene group when n is greater than 1, via hetero atom, R<sub>7</sub> is chosen from a hydrogen atom, a phenyl group and a benzyl group, R<sub>8</sub> is chosen from a hydrogen atom, lower alkyl groups and a carboxyl group, R<sub>9</sub> is chosen from a hydrogen atom, lower alkyl groups, a -CH<sub>2</sub>-COOH group, a phenyl group and a benzyl group; and

-polymers comprising units derived from sulphonic acid; and

(ii) the at least one polycondensate (A), the at least one film-forming polymer (B), and the device being chosen so as to obtain droplets of said hair composition having an average diameter of less than or equal to 80  $\mu$ m upon dispensing.

28-114. (Canceled)
